

# Making Neighbourhood Health Centres a Reality

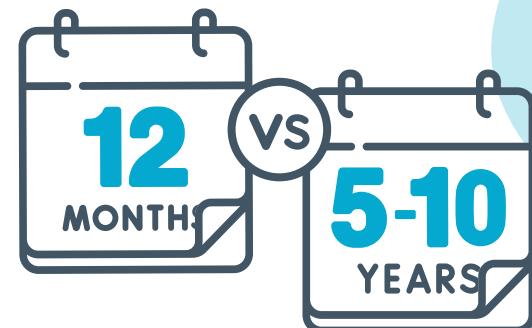

## Optimise the existing estate

With parts of the NHS estate operating at **just 40% capacity**, refurbishments and extensions can improve utilisation.

## Months not years

By optimising current NHS spaces, NHCs can launch **within 12 months**, cutting delays and costs compared to 5–10 years for new construction.

## Significant cost savings

Refurbishing existing estate costs **around £100k per consulting room**, compared to a potential £500k for new builds.

## Improved productivity

Refurbishing spaces to be **tech-forward** allows flexible layouts and smarter systems, boosting efficiency, expanding services, and improving patient experience.
