

Cotswold House

Project details

Location: Portsmouth

Type of project: Refurbishment of a vacant doctor's residence

Investment: £700k

Start date: July 2016

Completion Date: January 2017

Background

East Shore Partnership GP Practice had outgrown their current premises in the local area, which was cramped and did not meet CQC standards.

Cotswold House was identified as a new home for the GP Practice. The two storey freehold property belonging to NHS Property Services lay vacant on the St Mary's Community Healthcare site in Portsmouth. It had previously been a doctor's residence and was not set up for the delivery of healthcare.

Delivery

The project, coordinated and funded by NHS Property Services, included the complete refurbishment and remodelling of the internal space and an extension to the building. This allowed rooms on two floors to be reconfigured, making space for the installation of a passenger lift and new compliant stair case. East Shore Partnership now benefits from a variety of modern, compliant consulting rooms and supporting accommodation for the delivery of quality primary care services.

Testimonial

"The East Shore Partnership has recently completed a project with NHS Property Services who have provided a beautiful local and historical building, refurbished to current quality standards. Our new start has enabled us to enhance the delivery of our patients' care and enrich their experiences with us."

Veryan Burcham, Business Manager, East Shore Partnership
